At the Program in Human Sexuality, our mission is to advance the sexual health of Minnesota, the nation, and the world through preeminence in research, education, clinical service, and advocacy. Our vision is to revolutionize the sexual climate by eliminating barriers and advancing healthy sexuality.

Ground-breaking discovery through research
- Developing innovative and effective treatment models that address disparities
- Understanding of culture, stigma, and resilience in human sexuality
- Understanding of sexual and gender identities and development
- Understanding of sexual behavior and relationships

Compassionate, innovative, evidence-based care
- Introducing new best practices and continuous quality improvement for treatment protocols
- Providing specialized clinical services in the most critical areas
- Improving patient access to clinical care through multiple modalities
- Providing comprehensive and multi-disciplinary care teams

Science-based advocacy and public policy
- Collaborating with international organizations
- Advocating for marginalized populations
- Providing science-based knowledge to policy makers and opinion leaders
- Combating stigma and promoting sexual rights

Education and community partners
- Capacity building for community-based organizations
- Educating and training of medical and other professionals
- Increasing the sexual literacy of the public
- Enhancing the fellowship program in clinical sexology
We have had a great year at the Program in Human Sexuality (PHS). The faculty continued their outstanding work in research, education, clinical care, and public policy. Our research enterprise includes new investigators who are increasing our understanding of human sexuality and tackling vexing sexual problems. Our newest faculty member, Alex Iantaffi, PhD, is researching ways to overcome health disparities to HIV testing for Deaf men who have sex with men. The research of Michael Miner, PhD, continues to advance the fields of sex offender treatment and impulsive/compulsive sexual behavior by testing prominent theories and providing empirical challenges to accepted beliefs.

Through a generous gift, we have the opportunity to expand our educational endeavors and honor one of our former faculty members with the new Michael E. Metz Fellowship in Couples’ Sexual Health. Michael Metz, PhD, was a respected psychologist and author, and we will strive to prepare a postdoctoral fellow for a career that will combine expertise in clinical care and research.

In April, the Journal of Sexual Medicine published the article “Summit on Medical School Education in Sexual Health: Report of an Expert Consultation,” based on the meeting that we hosted in December 2012. We have distributed the report to 320 deans at medical schools throughout North America. Summit participants continue to collaborate on projects inspired by the meeting.

The Summit was the first project supported by the Joycelyn Elders Chair in Sexual Health Education. I am happy to share with you that we have reached the threshold of donor gifts required to begin a search for the first faculty member to hold the Joycelyn Elders Chair in Sexual Health Education. We owe thanks to our many new donors and our previous donors who made additional gifts or accelerated their gifts to move the time line of this effort forward.

Clinicians at the Center for Sexual Health provide excellent therapy to individuals and families of all backgrounds. This year, we have made an effort to expand our clinical research. By increasing our understanding of clinical outcomes, we can continue to improve our quality of care and share this knowledge with other treatment programs.

Throughout the year, several faculty members worked on projects in our community and around the world that impact public policy in the area of human sexuality. We will continue to advocate for a sexually healthy world by insisting that sound public policy be based on the best available science.

Thank you for all that you do to support our efforts to advance sexual health. It is because of you, our donors, our colleagues, and our advocates that we continue to thrive.

Thank you,

Eli Coleman, PhD
Academic Chair in Sexual Health
Professor and Director

Chair in Sexual Health

Highlights

Clinical Care

- 11,122 client visits
- 927 average visits per month
- 29 active therapy groups

Research

- $694,715 in grant support
- 19 peer-reviewed journal publications
- 3 report contributions
- 49 research and clinical presentations

Education

- 230 medical students received human sexuality training at the University of Minnesota and Mayo
- 6 medical student multi-week rotations
- 9 clinical rotations for family medicine residents

We graduated fellows Margaret Flaget-Greener, PsyD, Krista Nabar, PsyD, and Jordan Rullo, PhD.

The new Michael E. Metz Fellowship in Couples’ Sexual Health is a two-year fellowship that will combine training in clinical care and scholarly endeavors.

The article “Summit on Medical School Education in Sexual Health: Report of an Expert Consultation” was published in the Journal of Sexual Medicine.

At the end of the year, we met our donor gift threshold, making it possible to search for the first faculty member to hold the Joycelyn Elders Chair in Sexual Health Education.

D-P@rk study received the Twin Cities Deaf Pride Community Organization Award.

Cesar Gonzalez, PhD, was selected as a fellow for the National Institutes of Health Summer Institute on Randomized Behavioral Clinical Trials.

Bean Robinson, PhD, received the PHS Outstanding Service Award and Katie Spencer, PhD, received the PHS Faculty Mentor Award.

Welcome new assistant professor Alex Iantaffi, PhD.

Download “Transformation: Addressing Gender Issues in School” z.umn.edu/transformation
Compulsive Sexual Behavior and HIV Risk

The study aims to gather the empirical data needed to clarify the characteristics of sexual compulsivity and how it leads to increased levels of HIV sexual risk behavior. This is the first investigation to explore underlying factors drawn from the various conceptualizations of sexual compulsivity and will advance the understanding of this theoretical construct. The findings of this study will further a nuanced approach to the development of interventions and allow for targeting the most resource-intensive prevention efforts at those individuals most likely to spread HIV. Michael Miner, PhD, is the principal investigator of this study funded by the Centers for Disease Control and Prevention National Center for Injury Prevention and Control.

Sexual and Aging

This formative research project is designed to investigate sexuality, mindfulness, and the body in aging populations. The goal is to gather baseline qualitative and quantitative data on sexual functioning, sexual satisfaction, mindfulness skills, interest in mindfulness, and general quality of life. This year, researchers began collecting questionnaire data and conducting focus groups. The second phase of this project will include working with a local theater company to develop a script and production to promote community conversations about sexuality and aging. Sara Mize, PhD, and Alex Iantaffi, PhD, are co-investigators on this project funded by the Sexuality and Aging Research Fund at the University of Minnesota Foundation.

Somali Women’s Initiative for Sexual Health

The aim of this project is to conduct a rigorous analysis of the utility of a newly developed, dynamic risk factor assessment for sexual offenders, Sex Offender Treatment Intervention and Progress Scale (SOTIPS). Adding dynamic factors to a risk assessment, specifically ones that have been linked to risk of reoffending and are amenable to treatment, it has the potential to greatly improve our ability to assess risk and changes in risk over time. This project could result in a major step forward in sex offender management, in that we may identify an empirically valid method for tracking changes in risk status. Researchers are working with adult probation departments in New York, NY, and Maricopa County, AZ, to collect data on sexual offenders in treatment, interview directors of treatment programs, and conduct focus groups with treatment providers and probation/parole agents. Michael Miner, PhD, is the principal investigator of this study funded by the Department of Justice National Institute of Justice.

Trans* Health: Disparities in HIV Testing, Treatment, and Prevention

This pilot project will utilize community-based participatory research to conduct a needs assessment with the transgender community, focusing on online access, testing rates, medication adherence, and knowledge and acceptability of pre-exposure prophylaxis. Alex Iantaffi, PhD, is the principal investigator of this project funded by cosa. Now, the team is writing articles. Beam Robinson, PhD, is the principal investigator, and the study was funded by University’s Program in Health Disparities Research, IDEA Multicultural Research Award, and the UCare Fund.

SOTIPS Implementation Evaluation Project

The aim of this project is to conduct a rigorous analysis of the utility of a newly developed, dynamic risk factor assessment for sexual offenders, Sex Offender Treatment Intervention and Progress Scale (SOTIPS). Adding dynamic factors to a risk assessment, specifically ones that have been linked to risk of reoffending and are amenable to treatment, it has the potential to greatly improve our ability to assess risk and changes in risk over time. This project could result in a major step forward in sex offender management, in that we may identify an empirically valid method for tracking changes in risk status. We educate postdoctoral psychologists, medical students, medical residents, and researchers in specialized sexual health care and sexual science. With our community partners, we work to improve sexual health resources and education.

In April, the article “Summit on Medical School Education in Sexual Health: Report of an Expert Consultation,” was published in the Journal of Sexual Medicine and mailed to medical school deans throughout the United States and Canada. Working groups formed at the Summit continue to collaborate on projects.

We graduated three postdoctoral fellows, Margaret Flaget-Greener, PsyD; Jordan Rullo, PhD; and Krista Nabar, PsyD. We welcomed three new fellows, Philip Jai Johnson, PhD; Cesar Gonzalez, PhD; and Lauren Fogel, PhD. We also worked with community partners, Margaret Flaget-Greener, PsyD; Jordan Rullo, PhD; and Krista Nabar, PsyD.

We educate postdoctoral psychologists, medical students, medical residents, and researchers in specialized sexual health care and sexual science. With our community partners, we work to improve sexual health resources and education.

We promote the sexual health of individuals, couples, and families of all backgrounds and ages by providing assessment and treatment. We continue to explore ways in which our clinical care can be synchronized with clinical research. The research and clinical faculty are collaborating to develop a more focused research agenda in the area of transgender health, including the adult and adolescent international testing and assessment protocols. We have been working on developing electronic health record forms that increase the usability of electronic records to accurately track transgender patients and increase the ability to utilize clinical data for research.

The Transgender Health Services program is working with local providers to diversify and expand services. Now, patients may see outside providers while accessing specific services from PHS, from group or individual psychotherapy to medical interventions such as hormones and referrals for surgery. The providers working in Transgender Health Services have developed a new mission and values statement as well as instituted new materials including the packet for new patients and revised hormone consent forms. Cesar Gonzalez, PhD, has implemented a collaborative therapeutic assessment for the program.

Child and Adolescent Services continued to grow and three therapists have been added in the program: Alex Iantaffi, PhD, Cesar Gonzalez, PhD, and Brenna Wernersbach, PhD. Sara Mize, PhD, and Brian Zamboni, PhD, are developing a new sexuality and disability group.

Several faculty members have received specialized clinical training. Bean Robinson, PhD, became an American Association for Marriage and Family Therapy approved supervisor and Alex Iantaffi, PhD, is working toward the same goal. Iantaffi is also working to become a board certified dance movement therapist. Cesar Gonzalez, PhD, became board certified in clinical psychology by the American Board of Professional Psychology, and he is working toward an advanced schema therapy certification.

Clinical Research

Jamie Feldman, MD, PhD, is working on two clinical research projects. First is a retrospective, multicenter study on the long-term health of transgender individuals receiving hormone therapy, and second, a study based in the University of Minnesota Division of Epidemiology and Community Health on immunological factors and the risk of vulvodynia.

Cesar Gonzalez, PhD, is leading a project that examines the mental health conditions reported by patients who seek treatment for gender dysphoria. The aim of the project is to identify the mental health disparities and needs of transgender people in order to develop effective clinical interventions that are affirming of sexual and gender diversity.

Brian Zamboni, PhD, is analyzing data that examines sexual health education in the training programs for marriage and family therapists and massage therapists. Zamboni is working with two medical students who completed rotations at PHS to examine sexual health education among medical students at St. Louis University and Michigan State University.

Cesar Gonzalez, PhD, joined a double-blind, randomized controlled, multicenter study evaluating the effects of a smoking cessation drug in subjects with and without a history of psychiatric disorders. The study is based in the Department of Family Medicine and Community Health and led by Kola Okuyemi, MD, MPH.

Service

Brian Zamboni, PhD, is serving as chair of the sex therapy certification committee for the American Association of Sexuality Educators, Counselors, and Therapists.
Advocacy & Public Policy

Our faculty work to translate science-based information into science-based public policy.

Michael Miner, PhD, was appointed by the Federal District Court for Minnesota to an expert panel on sex offender civil commitment regarding the class action lawsuit Karsjens et al. vs Jesson et al.

Kate Spencer, PhD, testified before the Minnesota legislature to advocate for the necessity of transgender medical interventions to be included in the coverage of Minnesota’s health care exchange, MNsure. Although the coverage was not included, Spencer continues to work with OutFront Minnesota on issues of health care access for transgender individuals.

Katie Spencer, PhD, joined the OutFront Minnesota’s Trans* Justice Project. This effort will gather community activists and organizers to identify the top issues for lobbying and legislative work.

Eli Coleman, PhD, has been selected for the Transgender Military Service Commission at the Palm Center, Department of Political Science, University of California, San Francisco. He will be working on a new, multi-year research initiative to study transgender service in the US military. The initiative is the most comprehensive academic research project ever conducted on transgender military service.

Cesar Gonzalez, PhD, was selected to represent the National Latina/o Psychological Association in the American Psychological Association’s International Network on LGBTQ Issues in Psychology. Throughout the year, Gonzalez and his colleagues worked on the strategic plans for the International Network whose focus is to advocate for the health and wellbeing of sexual and gender diverse individuals across the world through collaboration among psychological associations.

Eli Coleman, PhD, continued to work on the document Blueprint for the Provision of Comprehensive Care to Transgender and Transsexual Persons and Their Communities in Latin America and the Caribbean for the Pan American Health Organization and the International Association for Physicians in AIDS Care.

Eli Coleman, PhD, continued to serve on the gender dysphoria workgroup for the American Psychiatric Association Council on Research and Quality Care (formerly American Psychiatric Association Task Force on Treatment of Gender Identity Disorder).

Eli Coleman, PhD, joined an expert consultation on sexually transmitted infection prevention titled Advancing Prevention of Sexually Transmitted Infections Through Sexual Health Promotion: Opportunities and Lessons Learned at a joint meeting of the Centers for Disease Control and Prevention, European Centre of Disease Prevention and Control, and the World Health Organization.

Eli Coleman, PhD, continued to serve as an advisor on the joint effort by the World Health Organization and the World Professional Association for Transgender Health to revise the International Classification of Diseases (version 11). The group held a consensus meeting in February.

Alex Iantaffi, PhD, participated in the Trans* Awareness Project’s digital media campaign, a collaborative project of the University of Minnesota Office for Equity and Diversity, Gay Lesbian, Bisexual, Transgender, Ally Programs Office, Transgender Commission; University of Minnesota Libraries; and the Queer Student Cultural Center.

After attending the National Coalition for Sexual Health meeting and participating on the Health Care Action Group, Katie Spencer, PhD, successfully advocated for the inclusion of sexual health information specifically for transgender people in the materials produced by the National Coalition for Sexual Health.
Our goal is to match the interests and passions of our donors with identified priorities and faculty projects. The Joycelyn Elders Chair in Sexual Health Education, the Chair in Sexual Health, and the John W. Money Endowed Lecture Fund account for $6.1 million in commitments toward our goal to raise $10 million in endowments. Endowments provide long-term sustainability and will allow us to grow interdisciplinary research and education, to improve clinical care, to support faculty, and to create a synergy of activities which will have a lasting impact on future generations. As PHS transforms into a more comprehensive, higher capacity, and internationally renowned program, we will become a fertile home for advancing sexual health in innovative, science-based, and sex-positive ways. This commitment uniquely positions us to become the world’s preeminent center for sexual health.

The Joycelyn Elders Chair in Sexual Health Education received generous challenge grants from the Tawani Foundation and the California Institute of Contemporary Arts. These grants inspired new gifts and accelerated pledge payments which helped us reach the required threshold of gifts to begin a faculty search. In 2014, we will recruit a new faculty member to serve as the first Elders Chair and focus his or her efforts on creating comprehensive life-long sexual education curricula, increasing the number of health care providers and health educators trained in sexual health, and expanding scientific research in sexual education.

The Chair in Sexual Health continues to provide critical support to ensure the program’s stability and continued status as a national and international leader: This year, the fund supported faculty training, communications, and a new advisory group of professionals in the field of human sexuality. The group met in Minneapolis to provide feedback on our strategic plan, position in the field, clinic programming, research advantages, and funding opportunities. Members include Betsy Crane, PhD (Widener University), Bernard Harlow, PhD (University of Minnesota), Julia Heiman, PhD (Kinsey Institute), Colleen Hoff, PhD (San Francisco State University), Elizabeth Letourneau, PhD (Johns Hopkins University), Michael Reece, PhD, MPH (Indiana University), and Rory Reid, PhD (University of California, Los Angeles).

The Michael E. Metz Fellowship in Couples’ Sexual Health was created with a generous gift from Hildy Bowbeer to honor the life and work of her husband, Michael Metz, PhD. Metz was a nationally respected psychologist and couples therapist, who served on the faculty of PHS. The two-year fellowship will combine clinical and scholarly endeavors in the area of couples’ sexual health.

The research project on sexuality, aging, and mindfulness, funded by the Sexuality and Aging Research Fund, has expanded. For educational purposes, the researchers are collaborating with a local theater company to write a play script and educational materials based on the data collected.
Other PHS Funds
$1,000 - $4,999 continued

- Ira and Harriet M. Reiss
- Leslie E. Ray
- Catherine D. Ravella

Psychological and Behavioral Consultants

- Michael John Porte
- Elizabeth M. Ploog
- Susan Phipps-Yonas and Albert Yonas
- Penelope I. Philpot
- Amy Peterson
- Revs. Thomas A. and Carolyn S. Owen-Towle
